

TUTORING IN EDUCATION

Course participants

International staff, teachers, educators, trainers, educators of primary schools, kindergartens and nurseries

Course objective

Equal opportunities and overcoming barriers in the possibility of using modern technologies in the work of a pedagogue

Course description

Five-day training including short theoretical lectures combined with extensive practical workshops. The workshops will be based on the use of free online tools; thanks to this, none of the people participating in the training will be obliged to incur additional costs for the purchase of software.

Day 1 Tutoring

Basic assumptions of tutoring, which is based on the relationship between human and human, tutor with the mentee. It is a personalized and holistic approach, taking into account that everyone is different and that our development takes place simultaneously in many areas. Tutoring is to support the development process - discovering talents and developing the skills of independent thinking and creation. Introduction to methodology

Day 2 Developmental and scientific tutoring

Characteristics of tutoring specifics, discussion of basic tools and first introductory workshops.

Day 3 Tutoring in education

Tutoring is a specific form of individual work of a teacher - tutor with a student. Tutoring may not be the only solution to the problems of modern education, but it will certainly support

the system; because it proposes a departure from mass education in favour of individualisation of teaching - that is, a return to the value of authentic education.

Day 4 Tutoring process

Description and characteristics of the tutoring process, description of tools and discussion of individual case studies.

Day 5 Tutoring process - workshop

Workshops on techniques and the use of effective tools that help in achieving measurable educational successes with pupils while maintaining professional satisfaction.

Course fee: 350,00 € (5 days)
